

## 962 Control Retrofit

- Retrofit replaces the Honeywell IPC 90, Texas Instruments 5 TI, and the TCAM systems.
- PLC and associated I/O cards are DirectLogic 205 series components.
- Output relays are solid state type; the old relays are replaced.
- Temperature control is handled by the PLC for increased reliability and consistency.
- Operator interface is a color touchscreen.
- DC power supply is replaced with a modern Siemens SITOP unit.
