

PC32C or PC32F Computer Retrofit

PC32F

PC32C

AWS-8259 Retrofit Computer

- Retrofit replaces either the PC32C or the PC32F found on 968/969 machines.
- Components have been designed and extensively tested by Advantech, a global leader in industrial automation products.
- The embedded low power Pentium 266 MHz processor is fanless.
- The 512 MB Ultra CompactFlash primary drive is a solid-state chip with a MTBF of greater than 1,000,000 hours.
- The memory chip is type SDRAM 128 MB.
- The system is designed to operate in ambient temperatures up to 140° F (60° C).
- Note that replacing the PC32F does require modification of the electrical cabinet door.
